An introduction to our Firm
Together, we shape a better world

From more than 88 offices in over 33 countries, over 16,000 planners, designers, engineers and consultant deliver innovative projects across the world with creativity and passion.
East Asia Offices

We have been active in East Asia for over 40 years, employing more than 3,000 staff.
Our creative spark and intellectual independence has been there from the very beginning.

These shared values, like the firm’s name, are essentially derived from the beliefs and convictions of the firm’s founder, the engineer and philosopher, Ove Arup.
