#### Course Structure:
The course includes theoretical and practical contents for students to gain experiences in designing and building a mechatronics system. Students are given opportunities to exercise their hands-on-practice through both laboratory and CAD sessions.

#### Textbook/Required Material:
Laboratory manual and notes

#### Course Description:
This courses’ aim is to broaden the professional and engineering interests of students by enhancing their practicum/team-based experience through initiatives different from those of traditional lectures and tutorials. This is a project-based course to develop the students’ knowledge/experience in designing and building a practical mechatronics system (formerly called Industrial Training). Students will work in teams to identify the needs for their designed prototype. Also, students will be given the opportunity to design and build various mechatronics components including electronic circuits, motors, sensors, etc. from CAD drawings, and practise their engineering knowledge through all laboratory sessions. The main goal is to develop and nurture skills in problem-solving, communication, interpersonal interaction, project and time management, etc. via the entire project.

#### Course Topics:
1. CAD design
2. Motors
3. Electronic/electrical circuits
4. Design and fabrication of a practical mechatronics system
5. Materials selections
6. Manufacturing process
7. Fundamental of instrumentation

#### Course Objectives:
1. Teach students to design and fabricate a practical mechatronics system. (P-O1, P-O3, P-O5)
2. Facilitate hands-on-practice in mechanical and electronics engineering for students (P-O1, P-O3)

#### Course Outcomes:
On successful completion of this course, students are expected to be able to:
A. Explain and apply the basic principles of engineering design. (1) (POC1, POC2, POC3, POC4, POC5, POC6, POC8, POC11)
B. Describe the key components of mechatronics systems. (1, 2) (POC1, POC2, POC8, POC11)
C. Communicate and collaborate effectively as a member of a project team. (2) (POC7, POC8)
### Assessment Tools:
(correlated course outcomes)
- Peer review – 10% (C)
- Log sheets – 10% (A,B)
- Project report – 30% (A,B,C)
- Project presentation – 20% (A,B,C)
- Performance of the final prototype 30% (A,B,C)

#### BEng in Mechanical Engineering (4-year program)

**Program Objectives:**
- **P-O1** Be able to communicate and perform as an effective engineering professional in both individual and team-based project environments,
- **P-O2** Have an international outlook with clear perspectives on the Pearl river Delta and Greater China,
- **P-O3** Be able to research, design, develop, test, evaluate and implement engineering solutions to problems that are of complexity encountered in professional practice and leadership,
- **P-O4** Clearly consider the ethical implications and societal impacts of engineering solutions,
- **P-O5** Continuously improve through lifelong learning.

**Program Outcomes:**
- **POC1** ability to identify and formulate problems in multidisciplinary environment with an understanding of engineering issues and constraints;
- **POC2** ability to design and conduct experiments as well as analyze and interpret data;
- **POC3** ability to apply knowledge of mathematics, science, and engineering for problem solving in mechanical engineering and related sectors or for further education in a research career;
- **POC4** ability to develop specification and to design system, component, or process to meet needs;
- **POC5** ability to understand the manufacturability, maintainability, and recyclability of engineering system and components;
- **POC6** ability to use modern engineering tools, techniques, and skills in engineering practice;
- **POC7** ability to communicate effectively;
- **POC8** ability to function in multi-disciplinary teams and provide leadership;
- **POC9** broadly educated with an understanding of the impact of engineering solutions on issues such as economics, business, politics, environment, health and safety, sustainability, and societal context;
- **POC10** clear understanding of professional and ethical responsibilities;
- **POC11** recognition of the need for life-long learning and continuing education;
- **POC12** international outlook with knowledge of contemporary issues.
